

NATURE-POSITIVE COFFEE

With Slow, you can go on a nature-positive coffee journey to...

Support the Farmers

With Slow, you can be sure that the farmers providing your coffee are working under suitable conditions and are paid fairly. Working directly with the farmers in Laos while supporting local social impact initiatives is the way Slow ensures they are getting a better life.

Bring back nature

Instead of destroying forests to grow coffee, Slow coffee is grown among the trees, without pesticides or chemical fertilisers. Forest-grown coffee preserves and regenerates local biodiversity, allowing other plants, insects, and birdlife to thrive.

Enjoy the taste

Managing the entire value chain from crop to cup, Slow delivers single-origin, 100 % Arabica coffee of high quality. In this way, Slow and the coffee farmers offer you an uncompromising and tasty coffee experience.
